# WHO ARE WE?

Vital Nutrition

The no. 1 food for your pet

**We are Vital Nutrition**, the new wet food with 100% high quality protein and natural ingredients produced by Alimentos Prosalud (APS) in Costa Rica, here to change your life and that of your pet

**Founded in 1975 in the El Roble region of Puntarenas**, Alimentos Prosalud is one of the most prestigious seafood processing and marketing companies in Latin America.

**Inspired by the love we receive daily from our furry friends**, we have developed the most nutritious, healthy, and delicious combinations to fill not only their bellies but also their hearts.

Your pet is everything - give them the best!

## MISION

Nurture the lives of dogs and cats through high-quality products that transmit their family's love.

## VISION

Be the #1 wet pet food brand in Central America and the favorite of loving pet owners, distinguished by our innovative, nutritious, and superior quality products.

# OUR PRODUCTION PROCESS

**Vital Nutrition is the product of years of market research, trend analysis and identification of the nutritional needs of pets.**

**Vital Nutrition, a highly palatable, superior quality product with outstanding benefits thanks to its added vitamins and minerals, was developed with the help of a technical team, food technologists, and animal scientists.**

High quality and safety standards are met in each of our production stages to guarantee product excellence and your pet's safety.

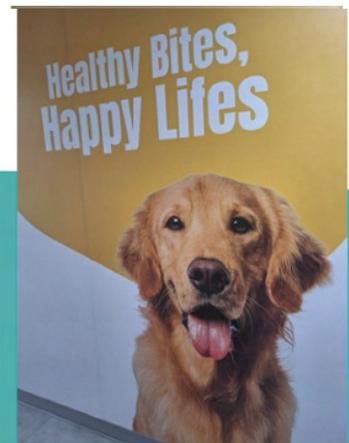

# OUR NEW PLANT

On March 14, 2025, Alimentos Prosalud inaugurated its new plant in El Roble, Puntarenas, dedicated exclusively to the production of pet food.

With a \$10 million investment and a daily capacity of 500,000 cans, this expansion will help us continue to grow and expand our international presence.

**This step reinforces APS's commitment to a sustainable business vision and a strong focus on quality and innovation..**

# BENEFITS

Fortified with vitamins and minerals that ensure your pet's well-being

## 100% HIGH QUALITY PROTEIN

Contains high-quality tuna, supplemented by other proteins as applicable.

## NATURAL INGREDIENTS

Almost all natural ingredients

## PROMOTES GOOD DIGESTION

Contains high-quality fiber.  
With no grains or flour, it promotes good digestion.

## REDUCES SMELLY BREATH AND FECES

Thanks to the presence of Yucca schidigera extract and fiber (lignocellulose)

## BOOSTS THE IMMUNE SYSTEM, SKIN, HAIR, AND NAILS

Contains vitamins A, B-complex, C, and E, as well as selenium

## RETARDS AGING

Due to the presence of antioxidants such as vitamin E, selenium, and chromium

## REDUCES ALLERGIC REACTIONS AND KIDNEY STONES

Contains vitamins D, K, and A and a proper balance of minerals and moisture

## GRAIN- AND GLUTEN-FREE

Contains no ingredients of this type, benefiting your pet's digestive health

# WET DOGFOOD

## **BEFF FLAVOR**

Presentations: • 85 grams • 295 grams

**PROTEIN:** Dark meat tuna, chicken, chicken by-products, dehydrated chicken protein, dehydrated beef protein

**MINERALS:** Calcium pantothenate, zinc sulfate, zinc amino acid complex, iron carbonate, iron amino acid complex, manganese sulfate, manganese amino acid complex, copper sulfate, copper amino acid complex, chromium amino acid complex, selenium amino acid complex, calcium iodate, propionic acid, ammonium propionate, silicic acid, sodium aluminosilicates, hydrated calcium, silicon dioxide, and calcium carbonate

**VITAMINS:** Vitamin A palmitate, cholecalciferol, tocopheryl acetate, riboflavin, thiamine, pyridoxine, menadione sodium bisulfite, biotin, cyanocobalamin, niacin, folic acid, and polyphosphorylated Vitamin C

Crude Protein .....	min 8.50%
Crude Fat .....	min 2.00%
Crude Fiber .....	min 1.50%
Moisture .....	max 81.00%
Ash .....	max 2.50%
Calcium.....	min 0.20%
Calcium.....	max 1.20%
Phosphorus .....	min 0.16%
Calculated Metabolizable Energy .....	800 Kcal/Kg

# WET DOGFOOD

## CHICKEN FLAVOR

Presentations: • 85 grams • 295 grams

**PROTEIN:** Chicken, chicken by-products, dark meat tuna, dehydrated chicken protein, dehydrated chicken broth.

**MINERALS:** Calcium pantothenate, zinc sulfate, zinc amino acid complex, iron carbonate, iron amino acid complex, manganese sulfate, manganese amino acid complex, copper sulfate, copper amino acid complex, chromium amino acid complex, selenium amino acid complex, calcium iodate, propionic acid, ammonium propionate, silicic acid, sodium aluminosilicates, hydrated calcium, silicon dioxide, and calcium carbonate.

**VITAMINS:** Vitamin A palmitate, cholecalciferol, tocopheryl acetate, riboflavin, thiamine, pyridoxine, menadione sodium bisulfite, biotin, cyanocobalamin, niacin, folic acid, and polyphosphorylated Vitamin C.

Calculated Metabolizable Energy .....	800 Kcal/Kg

# NEW

## LAMB FLAVOR

Presentations: • 85 grams • 295 grams

**PROTEIN:** : Dark meat tuna, chicken, chicken by-products, dehydrated chicken protein, dehydrated beef protein.

**MINERALS:** Sodium alginate, calcium sulfate, tetrasodium pyrophosphate, dextrose, titanium dioxide, selenium–amino acid complex, calcium iodate, choline chloride, precipitated and dried silicic acid, silicic acid, sepiolite, hydrated sodium and calcium aluminosilicates, silicon dioxide, and calcium carbonate

**VITAMINS:** Vitamin A palmitate, cholecalciferol, tocopherol acetate, riboflavin, thiamine, pyridoxine, sodium menadione bisulfite, biotin, cyanocobalamin, niacin, folic acid, calcium pantothenate, polyphosphorylated vitamin C (mono-di-triphosphate esters of L-ascorbic acid), zinc sulfate, zinc–amino acid complex, iron carbonate, iron–amino acid complex, manganese sulfate, manganese–amino acid complex, copper sulfate, \_\_\_\_\_ complex

Crude Protein .....	min 8.50%
Crude Fat.....	min 2.00%
Crude Fiber.....	min 1.50%
Moisture .....	max 81.00%
Ash .....	max 2.50%
Calcium.....	min 0.20%
Calcium.....	max 1.20%
Phosphorus .....	min 0.16%
Calculated Metabolizable Energy .....	800 Kcal/Kg

# WET CATFOOD

## TURKEY FLAVOR

Presentations: • 85 grams • 140 grams

**PROTEIN:** Chicken, chicken by-products, dark meat tuna, dehydrated chicken protein, dehydrated chicken broth.

**MINERALS:** Calcium pantothenate, zinc sulfate, zinc amino acid complex, iron carbonate, iron amino acid complex, manganese sulfate, manganese amino acid complex, copper sulfate, copper amino acid complex, chromium amino acid complex, selenium amino acid complex, calcium iodate, propionic acid, ammonium propionate, silicic acid, sodium aluminosilicates, hydrated calcium, and silicon dioxide.

**VITAMINS:** Vitamin A palmitate, cholecalciferol, tocopheryl acetate, riboflavin, thiamine, pyridoxine, menadione sodium bisulfite, biotin, cyanocobalamin, niacin, folic acid, and polyphosphorylated Vitamin C

Crude Protein .....	min 9.00%
Crude Fat.....	min 1.50%
Crude Fiber.....	min 1.50%
Moisture .....	max 82.00%
Ash .....	max 3.00%
Calcium.....	min 0.20%
Calcium.....	max 1.20%
Phosphorus .....	min 0.16%
Calculated Metabolizable Energy .....	800 Kcal/Kg

# FAQS

1

¿For what pet breed/age is VN recommended??

Vital Nutrition is a complete food formulated to meet the nutritional needs of any adult breed of dog or cat (from 1 to 7 years old).

¿How much food should you give them per day?  
¿What is the recommended amount?

2

Our recommended exclusive daily amount for adults - without mixing with other food, that is, if you only give them this wet food - is:

30 g of food per kilogram of live weight for cats and 65 g of food per kilogram of live weight for dogs.

Remember that you should consult with a vet to ensure that these general guidelines meet the specific nutritional needs of your pet.

CAT

30g OF FOOD

per kilogram of live weight

DOG

65g OF FOOD

per kilogram of live weight

# FAQS

## ¿Where can you buy Vital Nutrition?

3

Vital Nutrition can be purchased in the country's main supermarket chains, independent supermarkets, mini-supers, pet shops, and pet supply stores.

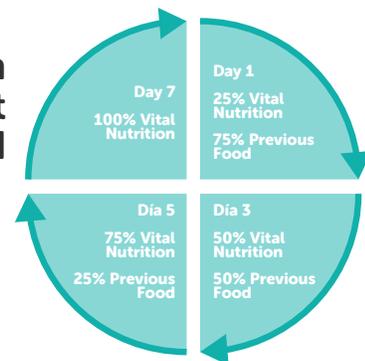

4

## ¿How should you make the change from your pet's current food to Vital Nutrition?

### Three situations may occur:

1. If you are replacing wet food with Vital Nutrition wet food, you should mix one-third part VN with two-thirds part current food for the first 3 days. Then, starting on the fourth day and up to the sixth day, mix two-thirds part VN with one-third part current food. From the seventh day on you can give your pet the full ration of Vital Nutrition.

2. If you are replacing a fully dry diet with 100% Vital Nutrition, you should replace it gradually, not suddenly. We recommend you do so as follows for one week:

3. If your pet currently eats dry food and you want to mix it with Vital Nutrition, no adaptation period is needed. You can mix up to 30% VN into your pet's daily diet.
